Hampshire Safeguarding Adult Board

Organisational Self Audit Action Plan

To support local agencies in developing their safeguarding arrangements, HSAB has developed the Organisational Safeguarding Self Audit Tool to help them evaluate the effectiveness of internal safeguarding arrangements and to identify and prioritise any areas in need of further development. Now the self audits have been completed, partner organisations are asked to complete this action plan in response to any development needs highlighted in the self audit. Any actions identified should be designated high, medium or low priority in the column provided. Please assign a RAG (Red, Amber or Green) status to that area. In the comments section, please provide evidence to support the rating given including any actions required.
